

Push Button Series  
**ILLUMINATED ICON**

# NI & SI Illuminated ICON Push Button Series

## PRODUCT SPECIFICATIONS

### DESCRIPTION

The NI & SI Illuminated ICON Push Button Series: this series design is for use in Surface, Mullion and Single Gang box mounting in both indoor and outdoor applications.

This NI & SI Series of Illuminated ICON Push Button with *SideCrk™* (model SI only) Button Guard Defender is designed to surpass the current demands presented today in application for visible exit controls. Faceplates are fabricated from aircraft grade aluminum with all rounded safety edges. The ICON lens quality bring a new level in ease of view not found on any other manufactured illuminated exit control available in today's market.

The NI& SI Illuminated ICON Push Button with 15 amp @ 125 VAC switch and Two (2) Torx tamperproof security screws are supplied bring another enhancement to this series.

This overall design and construction are ideal for applications where tamper resistance, edge deflection and safety issues are required.

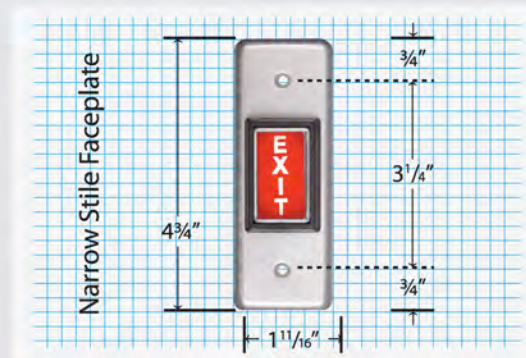

MBS Illuminated ICON Push Button Series, Performance by design is supplied with features pertaining to access and egress for real world security control pertaining to any facilities specifications.
