

Dome Push Button Series FACEPLATEICON

Dome Push Button Series

FACEPLATE ICON SPECIFICATIONS

DESCRIPTION

This Series of push switches are engineered to meet the stringent demands of access and egress controls for today's systems. The unique 1 1/2" diameter dome button design with *SideClick™* Button Guard Defender and 1/8" switch throw bring a new standard to performance in controls pertaining to anti-vandal issues while supporting ADA requirements. Faceplates are fabricated from thick aircraft grade aluminum with all rounded edges for safety and flush mounting. The ICON embossing brings a new level in visibility and durability combination not found in any other controls available in today's market.

The pushbutton mounting is also unique and innovative with its full surface threaded locking ring versus the set screw or plastic mounts currently being offered. In addition

the compact actuator and switch have a design with an internal projection depth of 1" including the prewired, weatherproof, 6 amp @ 125 VAC switch.

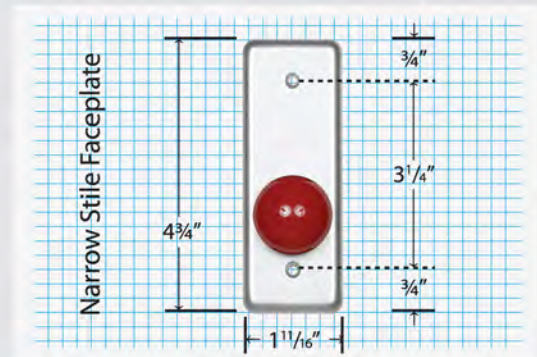

Two (2) Torx design tamperproof security screws which are supplied with every unit bring an added finish to the security features. This overall product construction is ideal for applications where the need for anti-vandalism, tamper resistance, edge deflection and safety issues are required.

MBS Key ICON Push Button Series are being supplied in a number of Button Colors and ICON configurations for real world access and egress system integration.

NP MODELS

The NP Faceplate ICON Push Button Series: Narrow Stile, (MULLION); the faceplate is 1 11/16" 44mm wide; perfect for door frame or narrow mounting surface areas.

- NPX35 – 1 switch SPDT momentary, Green Button, Plain Faceplate with BHMA 689 finish
- NPY35 – 1 switch SPDT momentary, Red Button, Plain Faceplate with BHMA 689 finish
- NPP35 – 1 switch SPDT momentary, Red Button, "PUSH TO EXIT" ICON with RED Letters, Faceplate with BHMA 689 finish
- NPE35 – 1 switch SPDT momentary, Red Button, "EXIT" ICON with RED Letters, Faceplate with BHMA 689 finish
- NPG35 – 1 switch SPDT momentary, Green Button, "PUSH TO EXIT" ICON with Green Letters, Faceplate with BHMA 689 finish
- NPH35 – 1 switch SPDT momentary, Red Button, "HANDICAP" ICON with White Backfill, Faceplate with ADA Blue finish

SP MODELS

The SP Faceplate ICON Push Button Series: Single Gang; faceplate 3" 75mm wide for gang box installation or surface mounting application.

- SPY35 – 1 switch SPDT momentary, Green Button, Plain Faceplate with BHMA 689 finish
- SPX35 – 1 switch SPDT momentary, Red Button, Plain Faceplate with BHMA 689 finish
- SPP35 – 1 switch SPDT momentary, Red Button, "PUSH TO EXIT" ICON with RED Letters, Faceplate with BHMA 689 finish
- SPE35 – 1 switch SPDT momentary, Red Button, "EXIT" ICON with RED Letters, Faceplate with BHMA 689 finish
- SPG35 – 1 switch SPDT momentary, Green Button, "PUSH TO EXIT" ICON with Green Letters, Faceplate with BHMA 689 finish
- SPH35 – 1 switch SPDT momentary, Red Button, "HANDICAP" ICON with White Letters, Faceplate with ADA Blue finish
